D.W. Pearce : Blueprint 4: Capturing Global Environmental Value: Sustaining the Earth: Capturing Global Value Vol 4 (Blueprint Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Blueprint 4: Capturing Global Environmental Value: Sustaining the Earth: Capturing Global Value Vol 4

(Blueprint Series):

Blueprint 4 continues the theme of Blueprint 2 in looking at the opportunities for using market forces for environmental ends. It assesses a range of possible imaginative 'global bargains', which give all parties a self-interested incentive to improve the global environment. The book begins by reviewing the principle global issues to be addressed, and then explains the mechanisms of resource degradation: how economic systems fail, the operation of trade on the environment and the effects of population growth and consumption patterns. It then shows how environmental value can be captured, and the basis, means and institutions for doing so.

'Required reading for anyone with an interest in the field.' Millennium - Journal of International Studies
About the Author David Pearce is Professor of Economics at University College London and main author of five previous Blueprint titles and numerous other books. He was for several years the chief environmental adviser to the UK Government.
