Searching for the next level of diversity By Barbara That Dr. Roosevelt Thomas, Jr. is searching for the next level of diversity is not unusual considering his stature as a respected guru in the field. But when Dr. Thomas says diversity has become a politicized "code word for affirmative action," and we - meaning organizations and society - are going to have a hard time getting to any next level because we're stuck in muddle-headed thinking about diversity, well, that is unusual! (He defines affirmative action as "the recruitment, promotion and retention of members of 'protected classes'" in the United States.) Thomas believes most organizational leaders, as well as society, have accepted the politicized definition of diversity, which positions it as a win/lose power struggle. We understand diversity through the lens of struggle because that's how we understand differences. The power struggle is a legacy of the Civil Rights Movement and of affirmative action, and we would argue it is also a legacy of other institutions which the United States has used to approach differences, such as Indian reservations, slavery, segregation and Jim Crow laws, Japanese internment, to name a few). If you are looking for a book to clarify your thinking about diversity, the legacies of Civil Rights and affirmative action, and how to improve people's ability to manage diversity, this book is essential reading. If you are looking for a thorough description of what the next level of diversity is, you won't find it. If we understand Dr. Thomas correctly, we have to master the craft of diversity management in order to discover what the next level is. Care to join us? Diversity is the reality of America today. Whether you let diversity be a drain on your organization or a dynamic contributor to your mission, vision, and strategy is both a choice and a challenge. Building on the Promise of Diversity gives you the insights and skills you need to navigate through simmering tensions -- and find creative solutions for achieving cohesiveness, connectedness, and common goals. Building on the Promise of Diversity is R. Roosevelt Thomas's impassioned wake-up call to bring diversity management to a wholly new level -- beyond finger-pointing and well-meaning "initiatives" and toward the shared goal of building robust organizations and thriving communities. This original, thoughtful, yet action-oriented book will help leaders in any setting -- business, religious, educational, governmental, community groups, and more -- break out of the status quo and reinvigorate the can-do spirit of making things better. The book includes a deeply felt analysis of the sometimes tangled intersections between diversity management and the Civil Rights Movement and affirmative action agendas . . . a personal narrative that charts Thomas's own evolution in diversity thinking . . . and a roadmap for mastering the powerful craft of Strategic Diversity Management, a structured process that helps you: * Realize why multiple activities and good intentions are not enough for achieving sustainable progress. * Recast the meaning of diversity as more than just race and gender, but as any set of differences, similarities, and tensions -- such as workplace functions, product lines, acquisitions and mergers, customers and markets, blended families, community diversity, and more. * Accept that a realistic goal is not to eliminate diversity tension but to use it as a catalyst to address key issues. * Recognize diversity mixtures, analyze them accurately, and make quality decisions in the midst of differences, similarities, and tensions. * Build an essential set of diversity skills and develop your "diversity maturity" -- the wisdom, judgment, and experience to use those skills effectively. * Reflect on the ways you might be "diversity challenged" yourself.

The book is a wake-up call that rings true... - Gulfshore Business "As he has done in his past publications, Beyond Race and Gender and Building a House for Diversity, in Building on the Promise of Diversity, Dr. Roosevelt Thomas has again asked us to expand our discourse and practice on diversity beyond limited conceptual models that prevent the realization of the richness and vitality inherent in our communities, our workplaces, and the greater society. 'Making quality decisions in the midst of differences and similarities (Diversity Management)', the author informs us, has powerful implications for organizations as well as for the leaders who are courageous and skillful enough to accept the challenges of a new era." -- Dr. Walter Fluker, PH.D., Executive Director, The Leadership Center at Morehouse College "At last, a clearly written guide by a leading expert that tells how to jump off the conventional diversity track and move yourself and your organization to a higher level of performance." -- John Alexander, President, Center for Creative Leadership "If you could read only one book about diversity, this is it! Avoiding the trap of pointing fingers at who is right or wrong and disappointed expectations of the past, Dr. Thomas offers a practical, experience-based framework within which leaders in public and private institutions can raise the level of diversity management to the level needed in our modern society." -- Dick Sibbersen, VP Human Resources, BellSouth Corporation "R. Roosevelt Thomas has provided a vital service in offering a detailed prescription for advancing the dynamic of diversity in American society. Even more important, he has reanimated the great vision of our greatest national treasure: the American Dream itself." -- Marc H. Morial, President and Chief Executive Officer, National Urban League "America's history is distinguished by its adventurous spirit, never satisfied with the status quo, always believing it can be better. Roosevelt takes us through the evolution of diversity, his personal journey, and many of the institutions that make us who we are as a nation. He challenges our contentment with being stuck in our current diversity paradigm and provides fresh thinking for using diversity management to harness the talents of all Americans, which is essential for competing effectively in a global economy." -- Thurmond Woodard, VP, Global Diversity, Dell "The remarkable Dr. Roosevelt Thomas, whose name has been synonymous with diversity leadership, has done it again in this splendid new book." -- Sheila Wellington, Clinical Professor of Management, Stern/NYU School of Business; former President of Catalyst "At last, a clearly written guide by a leading expert that tells how to jump off the conventional diversity track and move yourself and your organization to a higher level of performance." -- John Alexander, President, Center for Creative Leadership "A robust and thoughtful work.
