**From Routledge : Carbon Governance, Climate Change and Business Transformation (Routledge Advances in Climate Change Research)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Carbon Governance, Climate Change and Business Transformation (Routledge Advances in Climate Change Research):

Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security. Despite advances in policy, carbon management and continuing development of clean technology, fundamental business transformation has not occurred because of multiple political, economic, social and organisational issues. Carbon Governance, Climate Change and Business Transformation is based on leading academic and industry input, and three international workshops focused on low carbon transformation in leading climate policy jurisdictions (Canada, USA and the UK) under the international Carbon Governance Project (CGP) banner. The book pulls insights from this innovative collaborative network to identify the

policy combinations needed to create transformative change. It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change, the conditions under which business transformation can genuinely take place and key policy and business innovations needed. Broadly, the book is based on emerging theories of multi-levelled, multi-actor carbon governance, and applies these ideas to the real world implications for tackling climate change through business transformation. Conceptually and empirically, this book stimulates both academic discussion and practical business models for low carbon transformation.

About the Author Adam Bumpus is Assistant Professor at the Melbourne School of Land and Environment, University of Melbourne, Australia, and Associate Fellow and Manager of the International Carbon Governance Project workshops at the University of British Columbia, Canada. Blas Peacute;rez Henriacute;quez is Director of the Center for Environmental Public Policy at the University of California, Berkeley, USA Chukwumerije Okereke is Reader in Environment and Development at the University of Reading, and Teaching Fellow at the Environmental Change Institute at the University of Oxford, UK James Tansey is Professor in the Organizational Behaviour and Human Resources Division of the University of British Columbia, Canada
