**Mick Upton, Chris Kemp, Iain Hill : Case Studies in Crowd Management** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Case Studies in Crowd Management:

This important work has been compiled from a series of research projects carried out by the staff of the Centre for Crowd Management and Security Studies at Buckinghamshire Chilterns University College, and seminar work carried out in Berlin and Groningen with partner Yourope. It includes case studies, reports and a crowd management safety plan for a major outdoor rock concert, safe management of rock concerts utilising a triple barrier safety system and

pan-European Health Safety Issues.
