Kemal Dervis : Europe's Crisis, Europe's Future before purchasing it in order to gauge whether or not it would be worth my time, and all praised Europe's Crisis, Europe's Future:

0 of 0 people found the following review helpful. Great InformationBy Kenneth HinesLots of good information regarding why specific countries have had such a difficult time in the European crisis as well as why attempts to assist those countries have mostly failed. There are also succinct recommendations for how to move forward.

Can the eurozone's emergence from crisis turn into a real economic recovery and a new vision for Europe's future? Or is Europe heading for a "lost decade" in terms of growth and a rise in old style nationalism? Kemal Dervis and Jacques

Mistral have assembled an international group of economic analysts who provide perspectives on the most audacious supranational governance experiment in history. Will the crisis mark the end of the dream of "ever closer union" or lead to a renewed impetus to integrate, perhaps taking novel forms? Among the key issues explored are themiddot; Onset, evolution, and ramifications of the euro crisis from the perspective of three countries especially hard hitmdash;Greece, Italy, and Spain.middot; Concerns, priorities, and issues in France and Germany, the couple that has so far always driven European integration.middot; Effects and lessons in two key policy areas: banking union and social policies.The volume concludes with a possible renewed vision for the EU in the 2020s, including much greater political integration but where some countries may keep their national currencies and share less of their sovereignty. It is a vision of two Europes within one, ready for the twenty-first century.

Kemal Dervis and Jacques Mistral's edited volume, *Europe's Crisis, Europe's Future*, is a forward-looking text that does not recount the details of the causes of the financial crisis or the evolution of the Eurozone crisis, but instead seeks to make policy recommendations on what the next steps should be. -Political Studies About the AuthorKemal Dervis is vice president and director of Global Economy and Development at Brookings.
