Olivier Coispeau : Finance Masters:A Brief History of International Financial Centers in the Last Millennium before purchasing it in order to gage whether or not it would be worth my time, and all praised Finance Masters:A Brief History of International Financial Centers in the Last Millennium:

One thousand years ago, a handful of dynamic medieval city states developed trade at the frontier of capitalism. Their

unique commercial ambition led to the emergence of finance capitals of international significance: Finance Masters. From the 11th century onward, international financial hubs, led by astute and bold merchant bankers and visionary leaders, inspired the numerous innovations that triggered economic revolutions in the last millennium and laid the ground for modern finance. This book explores not only classic financial centers, but also offshore financial centers and gambling centers to connect them to contemporary finance, and it also delves into the unique function of leading financial hubs to execute financial transactions over a wide geographical domain and transform the world economy. The 2008–2009 Great Recession showed that working on fundamental issues such as market structure, pricing mechanism, and games was indeed necessary but probably still insufficient to create the antibodies needed to mitigate systemic risk and prevent the irrational exuberance capable of triggering devastating economic crash. In the continuation of the Theory of Moral Sentiments written by Adam Smith in 1759, seventeen years before his Wealth of Nations, it seems a deeper historical understanding of the key success factors which quietly assembled in the backyard of our market economy can be a useful lifeline. This book aims to explain the widening gulf that emerged over time between economics, regulatory and ethical considerations necessary to a smoother functioning of markets. Finance Masters is also a book about the extraordinary men who led the evolution of modern finance with the innovations that changed the course of economic history. This book tries to capture the salient factors behind the geography of finance hubs from the early fairs in medieval England and Venice to Wall Street in contemporary New York. The development and the legacy of those "Finance Masters" deserve more attention to reflect upon the evolution of incumbent players and better understand their possible future. This book is a must read for economics and finance students and young finance professionals, who seek a broader and better understanding of the origins of modern economics.

From the Inside Flap One thousand years ago, a handful of dynamic medieval city states developed trade at the frontier of capitalism. Their unique commercial ambition led to the emergence of finance capitals of international significance: Finance Masters. From the 11th century onward, international financial hubs, led by astute and bold merchant bankers and visionary leaders, inspired the numerous innovations that triggered economic revolutions in the last millennium and laid the ground for modern finance. This book explores not only classic financial centers, but also offshore financial centers and gambling centers to connect them to contemporary finance, and it also delves into the unique function of leading financial hubs to execute financial transactions over a wide geographical domain and transform the world economy. The 2008–2009 Great Recession showed that working on fundamental issues such as market structure, pricing mechanism, and games was indeed necessary but probably still insufficient to create the antibodies needed to mitigate systemic risk and prevent the irrational exuberance capable of triggering devastating economic crash. In the continuation of the Theory of Moral Sentiments written by Adam Smith in 1759, seventeen years before his Wealth of Nations, it seems a deeper historical understanding of the key success factors which quietly assembled in the backyard of our market economy can be a useful lifeline. This book aims to explain the widening gulf that emerged over time between economics, regulatory and ethical considerations necessary to a smoother functioning of markets. Finance Masters is also a book about the extraordinary men who led the evolution of modern finance with the innovations that changed the course of economic history. This book tries to capture the salient factors behind the geography of finance hubs from the early fairs in medieval England and Venice to Wall Street in contemporary New York. The development and the legacy of those "Finance Masters" About the Author Mr Olivier Coispeau During his career, Mr Coispeau worked for major financial institutions including J P Morgan (Paris, London, New-York), Clinvest (Paris) and Schroders (Paris, London). He specializes in growth acceleration strategies, complex partnerships and MA. He advised many Fortune 500 companies, foundations and governments. He was a Managing Director of Antfactory, a London based technology fund and a co-founder of other tech funds. He started his career in 1984 as a junior economist with CCCE, now AFD, in Noumea, New Caledonia. For several years, Mr Coispeau taught Economics in the University of Paris II Sorbonne and Finance at Ecole Supérieure de Commerce Paris. He is a frequently invited speaker at finance and industrial strategy forums. He read economics and finance at Stanford University, University of Paris IX – Dauphine and Institut d'Etudes Politiques de Paris. Many of his contributions have appeared in books and in press articles in business and professional journals, including most recently "Mergers Acquisitions and Partnerships in China" as the lead author and in "Corporate Social Responsibility in China with Benoît Vermander.
