Debashis Chatterjee, Peter Senge : Leading Consciously before purchasing it in order to gauge whether or not it would be worth my time, and all praised Leading Consciously:

0 of 0 people found the following review helpful. Insightful read if you're interested in ethics, and how our inner awareness guides how we lead. I read this book over 10 years ago, still keep it on the shelf and read sections from time-to-time. If you enjoy Margaret Wheatly, Steven Covey and other leadership guru's who attempt to look at the True North nature of leadership, or the unseen aspects to leadership, you will enjoy this book. It approaches the conscious nature of leadership through the lens of eastern philosophers. The book makes you think about the way your unconscious mind ethically guides your decisions and actions. It fills a gap between the difference between morals,

ethics and law. A difficult area to quantify with facts and figures, but at times the true north nature of the words hit you as self-evident. Do not purchase this book if you're looking for qualitative or quantitative analysis. It's spiritual in many ways, and looks at the Quantum mathematical elements of Wheatly's work, as ancient Indian sages may have looked at them thousands of years ago. 0 of 0 people found the following review helpful. Five Stars
By Elizabeth Bowers
All went well.
24 of 31 people found the following review helpful. A mediocre treatment
By A Customer
The bottom line with respect to this book is that there is simply little that is particularly new or remarkable here. On the contrary, this author's treatment of the subject matter is far more muddled and meandering than other contemporary treatments of "ancient" wisdom applied to contemporary leadership/workplace issues. There is a great deal that needs improvement in this book. The subject matter has been hashed over a lot recently, but good treatments would still be of interest. There's a lot of loose talk about "scientific evidence this ..." and "science is now showing that ..." etc. with no attempts to provide references or corroborating information. The author's writing style is such that he tends to careen from one thing to another in a way that I found simply annoying. In short, in my opinion this is not one of the better books in this area by any means.

Leading Consciously addresses the issues of motivation, decision-making, communication, time management, effective learning, work psychology, organizational development, and self-mastery. The author weaves together the insights of some of the most remarkable leaders of the world whose lives embody great truths about leadership and self-transformation, masters such as M. K. Gandhi, Edmund Hillary, Mother Teresa, and Albert Einstein. Debashis Chatterjee is an international management thinker, Fulbright scholar, corporate philosopher, mystic, and writer. He is a member of the faculty in Behavioral Sciences at the Indian Institute of Management in Lucknow, India. An immensely popular speaker on the themes of spirituality and modern management, Chatterjee organizes frequent leadership retreats for diverse audiences of executives, doctors, scientists, political leaders, and social service workers in India and around the world.

'I expect this book to be a landmark in the journey toward cultivating the human side of enterprise.... In an era entranced by 'the new' our greatest hope, ironically, may lie in rediscovering 'the old.'... This is a precious book. I hope it finds its way into the hands of readers who are as committed to the future as is its author.'
Peter M. Senge, author, The 5th Discipline
Debashis offers, through experiential methods, an opportunity for individuals to experience the power of the mind through visioning, concentration, and focusing on personal and corporate change.
Tom Phillips, Plant Manager, Ford Motor Company
A refreshing contrast to our conventional management wisdom.
Dr. Kenneth Goodpaster, former professor, Harvard Business School
Chatterjee is a teacher of great magnitude. Cheerfully negotiating the corporate world, carrying light and water to the desert, he makes a difference.
Dr. Jan Thatcher in The Edge
