From Psychology Press : Linking Expertise and Naturalistic Decision Making (Expertise: Research and Applications Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Linking Expertise and Naturalistic Decision Making (Expertise: Research and Applications Series):

This book contains selected papers presented at the 1998 conference on Naturalistic Decision Making (NDM). The objectives of the conference were to: *make American researchers more aware of NDM research being conducted abroad, particularly in Europe; *connect NDM research with work in management and industry, to stretch beyond the military and paramilitary focus; and *formulate a more explicit connection between NDM and expertise. These objectives are reflected in the chapters of this volume.

About the Author Salas is Professor of Psychology at the University of Central Florida and program director of the human systems integration department at the Institute for Simulation and Training. Gary Klein is a Senior Scientist at Applied Research Associates. He is the author of "Sources of Power: How People Make Decisions" (1999) and the coauthor of "Working Minds: A Practitioner's Guide to Cognitive Task Analysis" (2006), both published by the MIT Press.
