So I was really interested in this topic. Disappointed that she didn't mention Robesonia, my family furnace, but loved the approach she uses to history. 0 of 2 people found the following review helpful. It's Okay, By Jerrold A. Martin I think I need to check some of the history to see if it's correct. Some of the early steel making technologies were found to be taken from the works of

others.

Veins of iron run deep in the history of America. Iron making began almost as soon as European settlement, with the establishment of the first ironworks in colonial Massachusetts. Yet it was Great Britain that became the Atlantic world's dominant low-cost, high-volume producer of iron, a position it retained throughout the nineteenth century. It was not until after the Civil War that American iron producers began to match the scale and efficiency of the British iron industry.
