Erik Mitchell : Metadata Standards and Web Services in Libraries, Archives, and Museums: An Active Learning Resource: An Active Learning Resource before purchasing it in order to gage whether or not it would be worth my time, and all praised Metadata Standards and Web Services in Libraries, Archives, and Museums: An Active Learning Resource: An Active Learning Resource:

Metadata in library information environments is evolving rapidly. This book provides readers with a set of tools for designing, developing, and implementing metadata-rich information systems while also examining the challenges and opportunities in this field.

- Takes a cross-disciplinary approach to the issues, trends, and technologies relevant in information communities such as libraries, archives, and museums
- Presents grounded instruction that makes no assumptions about the technical expertise of the reader
- Perfect for new graduate students
- Provides structured learning activities that dovetail theoretical learning with the acquisition of hands-on and technical understanding that is essential for real-world success in metadata and information system design

"Graduate students and professionals in academic and public libraries, archives, and museums will find this book worthwhile as a resource for grasping the design principles that underlie web services in a cultural heritage context." - Technical Services Quarterly

About the Author Erik Mitchell, PhD, is associate university librarian at the University of California, Berkeley.
