It is a book that every business manager and executive MUST read. "The Big Pivot" puts forward nothing less than a vision and strategy for

the future of the business enterprise. After laying the foundation for why we need a different mindset in business, it describes three key pivots that business leaders need to make regarding business vision, valuation and partnering. Each chapter of the book is filled with fascinating new concepts, innovative ideas, great case studies, and especially, a "How to Execute" section that is very practical and understandable. Most of all, the book is a delight to read -- highly readable, humorous, fast-moving, and filled with examples of companies. I think this is his best book, at the very top of books on resilient/sustainable business, and one of the best books out there on business in general. It is no wonder that the April 2014 issue of the Harvard Business Review featured a cover article on this book! Put simply, "The Big Pivot" will establish the terms of business conversation for years to come. 1 of 1 people found the following review helpful. A Truly Important Book By Alison Lueders Andrew Winston's book lays out a clear and compelling case for addressing the threat of climate change now, instead of later. He explains the business reasons why further delay is actually bad for business. Climate change is here NOW: natural disasters cost the US over \$100 billion in 2012 alone. And that figure is only going to rise. As a business strategist who has advised the largest corporations for years, Winston understands the challenges they face. But the real bottom line is that if we don't address climate change now, we won't be around to debate business plans. We will have drowned, starved, or died in wars driven by too many people chasing too few resources. It's that stark. The book is not all gloom and doom - far from it. The threat of climate change creates enormous economic opportunities. We need new products and services that don't harm the environment for a huge new global middle class. Business has the resources and the innovative skills to build a green economy. Let's do it! 0 of 0 people found the following review helpful. Kindle version has missing pages - Unreadable By Rowan L. I'm only on the first chapter and I keep coming to pages that are a continuation of a page that isn't there. It's not even readable. If I buy a book for Kindle I'd like to know that I'm getting the ENTIRE book. How much do you charge for a book that has half the pages ripped out? Unbelievable. This book was way too expensive for this and Kindle apparently doesn't let you return faulty products. I kind find a place to submit an issue ticket or get my money back. What a scam.

We live in a fundamentally changed world. It's time for your approach to strategy to change, too. The evidence is all around us. Extreme weather, driven by climate change, is shattering records all over the planet. Our natural resources are in greater demand than ever before as a billion more people enter the global middle class, wanting more of everything. Radical transparency is opening up company operations and supply chains to public scrutiny. This is not some futuristic scenario or model to debate, but today's reality. We've passed an economic tipping point. A weakening of the foundations of our planetary infrastructure is costing businesses dearly and putting our society at risk. The mega challenges of climate change, scarcity, and radical transparency threaten our ability to run an expanding global economy and are profoundly changing business as usual. But they also offer unprecedented opportunities: multi-trillion-dollar markets are in play, and the winners of this new game will profit mightily. According to Andrew Winston, bestselling author (*Green to Gold*) and globally recognized business strategist, the way companies currently operate will not allow them to keep up with the current and future rate of change. They need to make the Big Pivot. In this indispensable new book, Winston provides ten crucial strategies for leaders and companies ready to move boldly forward and win in this new reality. With concrete advice and tactics, and new stories from companies like British Telecom, Diageo, Dow, Ford, Nike, Unilever, Walmart, and many others, *The Big Pivot* will help you, and all of us, create more resilient businesses and a more prosperous world. This book is the blueprint to get you started.
