**C. Leadbeater : The Frugal Innovator: Creating Change on a Shoestring Budget** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Frugal Innovator: Creating Change on a Shoestring Budget:

0 of 0 people found the following review helpful. change can happenBy G. R. HowellThis is a great book, well worth spending your money on. I had the pleasure of hearing Charles speak at a seminar in Perth WA, and he was brilliant! Inspiring book, encourages you to think about how you can innovate in your workplace, well worth the money. I have already put some of his ideas into practice with outstanding results. I can't wait to put some more ideas into

practice....0 of 0 people found the following review helpful. Great insights but poorly detailed examples  
By Mario A. Vazquez  
The book presents interesting ideas but the real life examples are poorly explained, so learning becomes difficult. A better description of the business models are needed

Great insights into the idea of 'jugaad'  
By Anand  
In India, the concept of 'jugaad' is pretty common-place. Your bicycle has a puncture? Simply stick a chewing gum over the punctured area, fill the tyre with air and go on with life. The closest synonym in English is 'improvisation'. While that has been a way of life for many in India and the rest of the developing world, a number of entrepreneurs too have started adopting these strategies in their business. The reason is simple - the media covering startups and entrepreneurship is mostly obsessed with what happens in the Silicon valley and how the various VC deals are clinched. Regardless of the number of such startups coming up, they are a negligible number compared to the overall number of entrepreneurial ventures launching across the world. These ventures have no funding to boast about, and have often got to make do with minimal resources. The idea of bootstrapping is not new. But Charles, in this book, reveals a few interesting case studies to show how these bootstrappers have been able to compensate the lack of funding with their creativity. As someone who has worked with several bootstrapping startups in recent times, this book brought out the creative side of bootstrapping and how this is adding a huge amount of value to the economy.

This insightful book looks at the phenomenon of low-cost innovation and explores what we can learn from the innovators in developing nations who are making amazing technical and social advances with scarce capital and resources. Charles Leadbeater shows how these methods can be applied and used wherever you are and whatever your capital.

'The essence of the book is excellent Leadbeater describes the kind of answers we need and shows how society could work in a constrained and crowded future' - Management Today 'Leadbeater...has carved out a reputation as an innovation guru...Reuse and recycling are core principles at the heart of his interesting new book" - Financial Times 'Charles Leadbeater is an acute free thinker. He sees trends and solutions where others see chaos and uncertainty. The Frugal Innovator is a challenge to us as well as a guide to the future.' -David Miliband, President and Chief Executive Office, International Rescue Committee and former UK Foreign Secretary 'With a deep understanding of emerging forces, The Frugal Innovator provides excellent insights for those who want to win long-term, with a purpose driven business in an increasingly resource scarce environment.' -Paul Ploman, CEO, Unilever 'Frugal Innovation is a vital contribution to our understanding of the decades ahead. The analysis is compelling; the solutions to the challenges of the 21st century, which sometimes seem overwhelming, are less likely to be found in western laboratories and more likely to be found in the rough-and-tumble suburbs of Lagos, Karachi or Satilde;o Paulo. Charles Leadbeater has found a wonderful cast of characters innovating in places such as this and turned them into a story of hope for us all.' - Sir Michael Barber, Chief Education Adviser, Pearson 'If you feel that the word 'innovation' is now so overused it has become boring, this book is a great antidote.' -Bruno Giussani, European Director, TED 'Charles Leadbeater is an inspiring and engaging story teller. His enthusiasm for innovations of all hues reflects in his narration that weaves easy to see patterns. He has seen the world of frugal innovation closely, and world over. He does not defend frugal innovation, he promotes it. Following his journeys over more than a decade can leave the reader breathless, wide-eyed and undoubtedly inspired.' -Madhav Chavan, Founder and Chief Executive, Pratham 'Much about our modern economy is profligate and wasteful, and that includes how we do innovation, whether in the form of vast R and D labs or the almost instant obsolescence of digital consumer products. Charles Leadbeater once again brings together eloquence and a multitude of fascinating global examples to show us a better way, far more suited to an era of austerity and ecological constraint.' -Geoff Mulgan, Chief Executive, Nesta; Author of The Locust and the Bees 'This book is a celebration of ingenuity and creative magic; bringing to our attention great ideas that have bubbled to the surface from the most unlikely places. It celebrates a climate change of ideas and possibilities; promoting novel solutions to people's most pressing problems. The book is a joy; it is also an admonition. We are left grateful, knowing what is possible; and cautious, knowing how close to the edge we are all unknowingly living.' -Mitch Besser, Founder, Mothers-2-Mothers  
About the Author  
Charles Leadbeater is an independent advisor, best-selling author, award-winning journalist and recognized thought-leader on innovation whose advice is sought by governments, cities and organizations throughout the world. He was awarded the prestigious David Watt Prize for journalism after a distinguished career at the Financial Times, where he was Labour Editor, Industrial Editor and Tokyo Bureau Chief all by the age of 32, before leaving to become Assistant Editor at The Independent. Leadbeater went on to become a key advisor to Tony Blair's policy team at the Downing Street Policy Unit and the Department of Trade and Industry, specializing in the impact of the Internet and the knowledge driven economy, helping to shape government policy across a number of fronts. He is a senior research associate with Nesta, the UK's innovation fund, a trustee of the Nominet Trust, the social tech investment fund and has a long track record of involvement in social innovation, not least as chairman of the social enterprise Apps 4 Good. He was a co-founder of Participle, the public service design

agency and is an associate of the Centre for London.
